EXPERIENCE

Content Moderator / Operations Associate

March 2025 – May 2026

Review and process digital content daily, managing task queues under tight SLA windows while keeping error rates low.

- Coordinated daily team communication, task assignments, and status updates via Lark and an internal workflow system (TCS).
- Followed strict SOPs and compliance guidelines without exception — accuracy matters more than speed in this role.
- Flagged and escalated edge-case content by working directly with team leads, which shortened resolution time.
- Built a habit of catching ambiguous cases before they reached QA — reduced rework without being asked to.

ACADEMIC PROJECTS

Hiyas ng Salita — Educational Game Website

React web application | Team project

- Built UI components and wired up game logic for an interactive Filipino vocabulary game using React.
- Handled state management for multi-step game flows; applied component-based architecture throughout.
- Iterated on usability with teammates, improving gameplay flow based on playtesting feedback.

SAP Management — ERP System Simulation

Academic requirement | School-based

- Completed structured ERP workflows covering data entry, process navigation, and reporting within SAP.
- Learned how business operations and workflow management translate into an enterprise system context.
